9.Experiment: AI-Assisted Features & Zia Analytics in Zoho Creator

Aim:

To explore and configure built-in artificial intelligence capabilities (Zia) and advanced analytics features within Zoho Creator for intelligent data querying, predictive forecasting, and automated insights.

Overview:

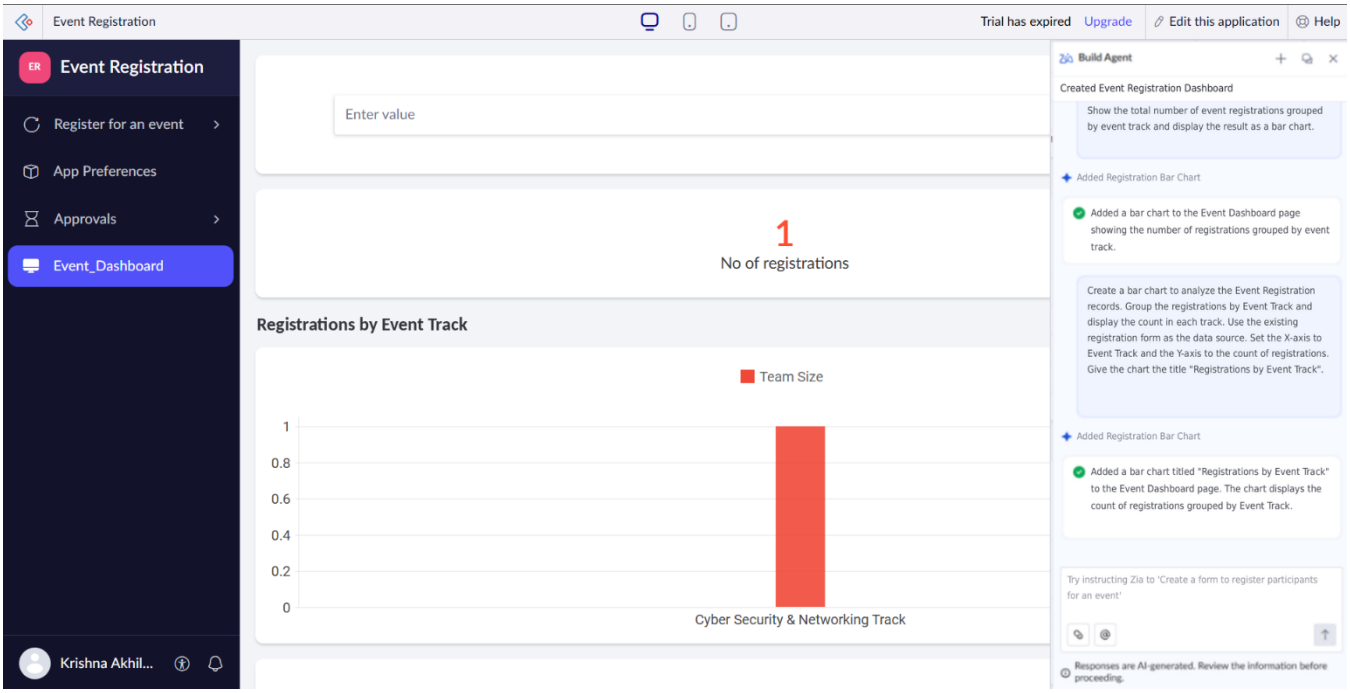

Zoho Creator integrates Zia (Zoho's conversational AI and analytics assistant) to empower low-code developers with natural language processing, automated chart creation, anomaly detection, and predictive analytics.

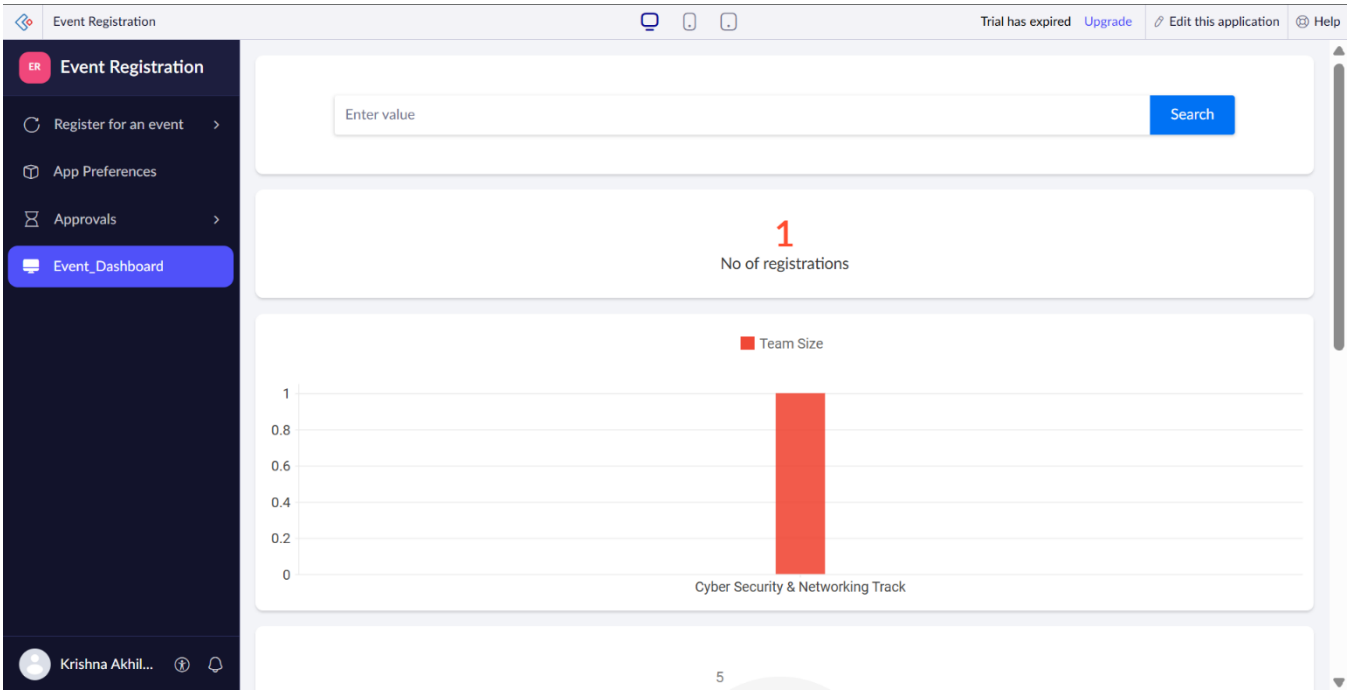

Feature / Capability	Functional Description in Zoho Creator
Zia Voice & Chat	Allows users to query application data and trigger reports via conversational commands.
Smart Analytics	Automatically suggests metrics, pivot tables, and visual charts based on dataset patterns.
Anomaly Detection	Flags irregular data entries, performance delays, or transaction spikes using machine learning.

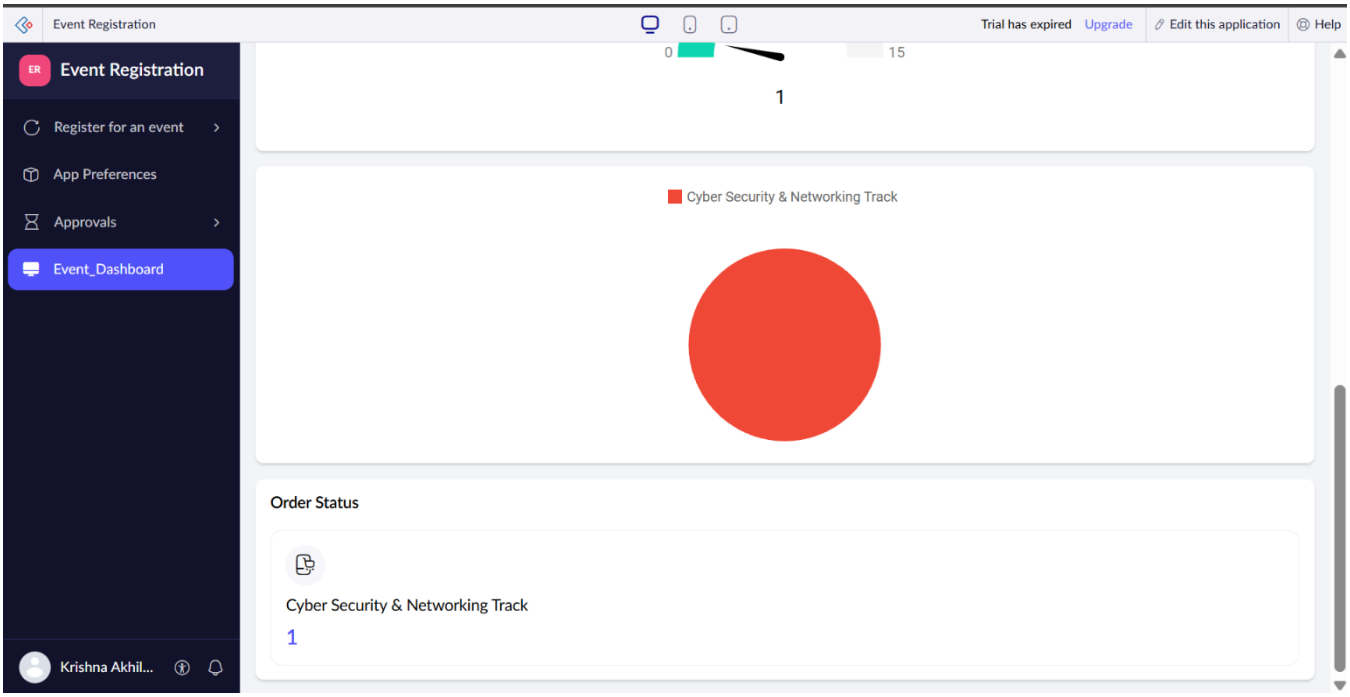

Procedure:

1. **Enable Analytics & Zia:** Open your Zoho Creator application workspace, navigate to the *Analytics* module, and ensure Zia AI assistant integration is active for your target data tables.
2. **Generating AI-Driven Dashboards:** Use the natural language query prompt box to type commands like *"Show total revenue grouped by month as a bar chart"* or select Zia's automated dashboard recommendations.
3. **Configuring Predictors & Insights:** Set up data prediction models to forecast future trends based on historical application records (e.g., project completion dates or order volumes).

Created Event Registration Dashboard
Show the total number of event registrations grouped by event track and display the result as a bar chart.
Added Registration Bar Chart
Added a bar chart to the Event Dashboard page showing the number of registrations grouped by event track.
Create a bar chart to analyze the Event Registration records. Group the registrations by Event Track and display the count in each track. Use the existing registration form as the data source. Set the X-axis to Event Track and the Y-axis to the count of registrations. Give the chart the title "Registrations by Event Track".
Added Registration Bar Chart
Added a bar chart titled "Registrations by Event Track" to the Event Dashboard page. The chart displays the count of registrations grouped by Event Track.
Try instructing Zia to 'Create a form to register participants for an event'
Responses are AI-generated. Review the information before proceeding.

Result:

The experiment successfully demonstrated the integration of AI-driven analytics using Zia in Zoho Creator, proving its efficiency in delivering automated business intelligence and natural language data exploration without manual script coding.
